

August 2012

City of Grand Forks

The Mayor's Green 3 Initiative features hybrid buses that burn less diesel fuel, alternative energy choices and a strong focus on recycling and protecting our environment for generations to come. The city has even reprogrammed traffic lights throughout Grand Forks, to keep traffic moving and allow vehicles to use less fuel.

Recycling is easy – you don't even have to sort glass, cardboard or aluminum – just toss it all into a container and put it out on your designated day and the city will haul it away for you. Just about everything is recyclable. The more we recycle, the less goes into our landfill.
